**PREMIER DENTAL ANESTHESIOLOGY NEWS TODAY**

**Better Faster Cheaper—NOW!**

We are always looking for the things in our life to be better, faster or cheaper. Many times we want all three and if you're talking about healthcare, you can bet all three apply. We'd all like our healthcare system to be better, faster and of course, cheaper. We may be getting some relief as many procedures are moving away from hospitals and surgery centers and are being performed in an office. This includes dental procedures requiring anesthesia. Without the added fees that patients are required to pay to the local hospital or ASC, their out of pocket expense is dramatically reduced. In addition to a lower cost, the patient and the dentist both, are not at the mercy of the hospital OR schedule if the procedure can be done in-office.

We believe:

We deliver the **better** by administering the safest form of IV deep sedation / general anesthesia to your patients. A board certified anesthesiologist and a certified nurse will always arrive in your office.

We deliver the **faster** by offering appointments sometimes as soon as one week out.

We deliver the **cheaper** by not requiring any additional hospital / ASC facility fee from your patient.
