PREMIER DENTAL ANESTHESIOLOGY NEWS TODAY

It was the growing interest in dental anesthesia coupled by a tragic pediatric death in a Chicago dental office that prompted physicians in our anesthesia group to create a dental division, known as Premier Dental Anesthesiology. That was nearly four years ago.

Dr. Tom Saak on the set at Lumivid

Thousands of cases later and with a 100% success rate, we remain Missouri's only group of board certified anesthesiologists who will enter your dental office and safely sedate both children and adults using IV sedation and/or complete general anesthesia.

Over the past 12 months momentum has picked up considerably as we have grown our practice to serve five counties and currently we are investigating expansion into Kansas City.

Although this growth is exciting, it can sometime be challenging to make sure that our message is consistent. Recently, we teamed up Lumivid, a St. Louis based production company that produces videos for websites. Lumivid has a unique and engaging way to correctly connect with your audience. Recently our Dr. Tom Saak sat down with local talent, Katy Kruze and they taped a session where he answered the most commonly asked questions from patients.

If you are interested in asking how Lumivid can help your practice grow by creating an engaging website and adding in videos of services or products that you already use (such as Premier!), they'd love to help you. For more information, visit their website, www.lumivid.com.
